RoHS Compliance

Dings brakes has partnered with the global community to produce products that are environmentally safe. The European Union (EU) has passed legislation to prevent six harmful substances above determined levels of concentrations from being used in electrical equipment.

These substances are:

- Cadmium
- Mercury
- Lead (Pb)
- Hexavalent Chromium
- Polybrominated Biphenyl (PBB)
- Polybrominated Diphenyl Ether (PBDE)

Several states in the U.S. are adopting the EU standards.

The following standard catalog Dings brakes come standard with RoHS compliant components:

- ✓ 40 Series
- ✓ 50 Series
- ✓ 56 Style
- ✓ 60 Series
- ✓ 70 Series
- ✓ 80 Series
- ✓ 90 Series (Dash 50, 51 & 52)

Our old 90 Series (Dash 30, 31 & 32) and our Navy Brakes (5-70000-42 & 5-80000-27) can meet RoHS Compliance upon request.

All future Dings Brake products that are on the drawing board will also be compliant with this legislation. Dings does not charge extra for this standard and our lead times are not extended when RoHS compliance is requested.

Dings understands the importance of keeping our environment safe and our earth green. We are committed to making our earth safer for all of our generations to come.
